

# Human Body: Skeletal System Review

**Essential Question:** What is the structure and function of the skeletal system?

**Objective:** Review skeletal system structure and function for test preparation.

---

Without using any resources, fill in this table.

Structure	Composition	Function(s)
1. Bone		
2. Cartilage		
3. Axial skeleton		
4. Appendicular skeleton		
5. Compact bone		
6. Spongy bone		

---

**Complete the following simile.**

The skeletal system is like the framework of a house because:

# Human Body: Skeletal System Review

Compare the types of synovial joints in the body, and give an example of each.

Joint	Type of Motion	Example
Ball and socket		
Condylar		
Hinge		
Plane		
Saddle		

Describe the cause and treatment of these skeletal conditions:

Arthritis

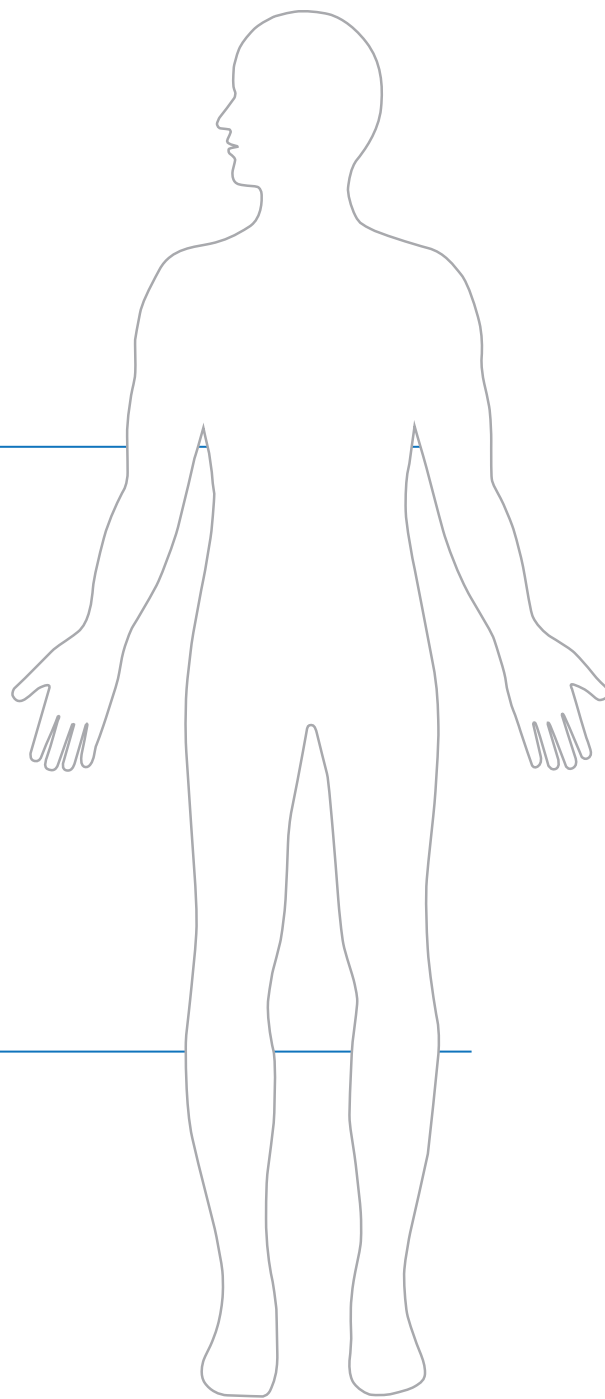

Break or fracture

Bursitis

Joint dislocation

Osteomyelitis

Describe the role of the skeletal system in blood production.

Color-code the axial and appendicular skeleton.
