

# Human Body: Digestive System Review

**Essential Question:** What are the locations, enzymes, and functions of the glands and organs in the digestive system?

**Objective:** Review digestive system structure and function for test preparation.

---

Without using any resources, fill in this table.

Gland/Organ	Enzyme(s)	Function(s)
1. Mouth and salivary glands		
2. Esophagus		
3. Stomach		
4. Small intestine		
5. Large intestine		
6. Rectum and anus		
7. Pancreas		
8. Liver		
9. Gallbladder		

---

**Complete the simile:**

The digestive system is like a fossil fuel power plant because:

# Human Body: Digestive System Review

The flow chart below lists each major organ in the digestive system, from mouth to anus.

For each organ:

- Summarize the physical and chemical changes that occur during digestion.
- Identify at least 2 common diseases.
