

Carolina's Young InnovatorsSM

AHMED MUHAMMAD

Oakland, California

Age 17 at the time of innovation

**ACHIEVEMENT: DEVELOPED
A NONPROFIT CORPORATION
TO HELP ELEMENTARY KIDS
LEARN ABOUT SCIENCE**

If you think science is hard, Ahmed wants to change your mind.

Ahmed wanted to prove to his younger niece and nephew that they could do science. Even if they felt they weren't good at the subject. His backyard project was the beginning of Kits Cubed. This company is a youth-led, nonprofit started by Ahmed. He wanted to make easy, fun, and affordable science kits. He hoped these experiments would inspire elementary and middle school kids.

Ahmed put together a team of other dedicated students. They created a website to sell the kits. Profits from kit sales are used to donate kits to children who do not have access to them. Ahmed wants everyone to have the opportunity to do science.

Ahmed has given thousands of kits to schools around Oakland, California. He wants to share his passion for science. He wants to make science accessible to all children in his community.
